Taking care of your water network

Traffic Management – Accessing the Reservoir

Diversion route:

- Public diversion routes around the Reservoir will be via Temple Village and, on the occasion, some construction traffic who require to access the East side of the reservoir.
- The **majority of construction traffic will access our work location via Gladhouse Mains Farm**, away from Temple Village and local properties.
- Public use of the reservoir will still be permitted during our work although, **there will be no through path for the public via the bridge route.**
- Please be mindful of the reservoir clearway – this route should remain clear **for emergency and operational vehicles.**
